EXPERIENCE

        As a software engineer fresher, your career objective could be something
like:"To leverage my strong programming skills and passion for technology to contribute
to innovative software solutions, while continuously learning and growing in a dynamic
and collaborative environment".

PROJECTS

DRIVER MONITORING SYSTEM:

This document is a review report on the research conducted and the project made in the
field of Information Science and Engineering to develop a system for driver drowsiness
detection to prevent accidents from happening because of driver fatigue and sleepiness.

**AN IOT BASES SMART MIRROR FOR ENHANCING DAILY LIFE USING
ARDUINO**:

 The application's key focus is to be able to easily control household appliances, the user
will be provided with better support. An on/off switch is given directly to act as an
interface between the application and the NodeMCU which enables the user to manually
control the appliance without the use of any automated device
